

International Business Management

Become a Business Professional

UIC's International Business Management programs prepare students for the labor market to assume management or leadership positions in the international business and trade industry.

South Florida is a key location for learning about international trade and commerce since it stands right in the middle of the Western Hemisphere, and attracts a large international business community. Port Miami and Port Everglades are both located in the South Florida region creating a hub for trade companies with businesses in Central America, South America, the Caribbean, Europe and the Far East. Port Miami is the closest container port to the Panama Canal, which facilitates the fastest access to the US consumer market. UIC students take trade workshops with Port Everglades.

UIC offers the tools for students to become entrepreneurs or join the labor market. UIC has incubated successful businesses throughout its history.
